Sanskrit Pronunciation: Booklet and Audio

by Bruce Cameron Hall

Ph.D. (Sanskrit and Indian Studies) Harvard University

This booklet and the accompanying recording are designed to help students learn to pronounce Sanskrit terms found in theosophical literature. They should enable speakers of English to pronounce Sanskrit words so that they are recognizable to Indian scholars. Both booklet and recording contain four parts. Part 1 (*Pronunciation Guide*) is a set of instructions for pronouncing Sanskrit words. Part 2 (*Sanskrit Terms*) is an alphabetical list of Sanskrit words often found in theosophical texts, with brief definitions. Students can use this list to practice pronunciation, using the recording to correct themselves. Part 3 (Summary) is a two-page pronunciation list of the Sanskrit letters. Part 4 (*Sample*) is a two-page sample of Sanskrit verse in Devanāgarī, romanization, and English translation. Words contained in square brackets in the printed booklet are not recorded.

I thank the students in my Sanskrit class at the Theosophical Library Center in Altadena and staff members of the Center who have been most generous with suggestions and comments.
